ECOMMERCE WEBSITE

→ Login Page (login & logout)
→ Home (list down product categories)
→ Product List (List of diff products based on categories)
→ Product Details (Detail of single product)
→ Cart
→ Checkout Page.

Best Practices for Folder Structure

→ keep your base folder either as 'src' or a 'root'

→ Any text file should be present in root or src.

→ Try to give names to the folder as simple as possible like css, Home, Product etc.

→ Avoid nesting of folders.

→ Try to keep separate files for html, css, JS.
